

International Business Center of Sustainable Development (IBCSD) Statement

The reason for establishing IBCSD is the global development of trade and industry and its impact on global environment. Long before starting my entrepreneurship career I have to face variation of exploitation of humans and resources happening daily, gaining profits for small number of people.

My aim is that **International Business Center of Sustainable Development** becomes largest industrial player in the world and hope our activities will not be limited to the earth only, in contrary. Everywhere where industry is in game, waste occur, everywhere resources occur which are usually underestimated in volume and value.

International Business Center of Sustainable Development is not limited to segment, region or time, neither is the obstacle the age of our associates.

IBCSD will have next prerogative, it will be largest business in the world and at the same time it will have no employees. Every single member of IBCSD will be an associate with direct share on profit, and direct possibility to talk to the processes available and known to him or her.

Instead of targeting top managers, we are targeting top workers, prefers experience which came usually with age, but do not take age, or gender as the only criteria. There are young talents which will be great benefit to IBCSD so as IBCSD can be of great benefit to them. An associate is not limited to person, but companies already join and support the development.

Every single associate have to respect 3 principles on which IBCSD is based on, these are the principles of LOGISTICS EFFICIENCY DESIGN (L.E.D.), defined by founder of IBCSD so as L.E.D.

The principles are:

TRANSPARENCY OF ALL PROCESSES

PROFIT SHARING BETWEEN ALL ACTIVE INVOLVED

EFFICIENCY IN COMPLEX GLOBAL CHAIN

International Business Center of Sustainable Development do what others talks about. It proactively process, design and produce products of secondary material utilization.

Where you produce and see waste, IBCSD see resources for products, material and work. Where you see empty buildings, we see flats, factories, workrooms, place to live and place to work. Where you want to see greenfields with new shopping malls, factories, and mines, we see place to live and play, trees, relax zones for all the people who deserve it not only for those who can buy it.

International Business Center of Sustainable Development is not the place where managers or investors get the biggest profits. IBCSD is the place where the people who do great physical, or mental work get these profits instead, as reward for great and hard work they did. So new economy would be established, economy which by eliminating old burdens will utilize old wastes to generate new potentials and benefits for all who will be able to support pro-active.

My name is Michael Rada, and I am the founder of IBCSD so as L.E.D. I lead the center so as all L.E.D. projects and do all for the aim to be achieved, not for me, but for the people who do. I hope it will be YOU and your BUSINESS who will support and benefit from **International Business Center of Sustainable Development** work results.

Michael Rada – President and Project Father
